**Endoscopy training course (Endo-Bologna) is consider one of the best training courses !**

○ At the end of Course, The trainee will get certificate from Università di Bologna

○ The Course will be accredited by the European Accreditation Council for Continuing Medical Education

○ Enjoy Live surgery daily

○ Daily Hands on training to acquire basic / intermediate level skills in laparoscopic gynecology that including " Hands-on simulation-based training of suturing and Laparoscopic skills dry lab

○ Daily you will participate in " Clinical attachment Scenario" to be able to observe and engage in hands-on clinical practice and earn new skills

○ Attend the scientific sessions

○ **All endoscopic cases will be performed (Laparoscopic hysterectomy - Laparoscopic myomectomy - Laparoscopic Endometriosis surgery - Advanced hysteroscopic surgeries)**

# Register Now ! limited seats are available

## Course Description

This hands-on, basic/intermediate Gynecologic laparoscopy course is designed for gynecologists who wish to develop their laparoscopic skills to enable the performance of a broad range of basic laparoscopic gynecological procedures. Laparoscopic procedures will be outlined and broken down into simple steps and basic principles will be discussed. Different strategies and approaches that may be undertaken to accomplish these steps will be demonstrated, during live surgeries and video sessions. Tips and tricks that will facilitate safe abdominal entry and a wide range of laparoscopic procedures will be demonstrated, including important tactics utilized to avoid complications.

## Course Objectives

**The aim of this course is to allow practicing gynecologists as well as residents /fellows to acquire basic/intermediate level skills in laparoscopic gynecology including hands-on simulation-based training of suturing and essential procedures.**

At the conclusion of this activity, the participant will be able to:

1. Demonstrate knowledge of pelvic anatomy, safe entry techniques and basics of electric-based surgery
2. Outline the basic steps of some essential gynecologic procedures, with tips and tricks needed to accomplish them safely and successfully.
3. Discuss areas of potential complications in Gynecologic Laparoscopy and review methods of prevention and treatment.
4. Practice and acquire competence in basic laparoscopic skills:  
Camera manipulation 0°; Camera Manipulation 30°; Eye-hand coordination; Grasping and dissection; Two-handed maneuvers; Cutting; Electrocautery; Translocation of objects.
5. Perform basic types of laparoscopic suturing.

## Target Audience

**Practicing gynecologists, as well as gynecology residents/fellows, interested in hands-on simulation-based training of essential laparoscopic procedures.**

## Assumptions

It is recommended to include a cognitive skills module at the beginning of the training program. No previous procedural or technical knowledge is required. Trainers and modules will be provided by the organizing society.

**Course director:**

**Renato Seracchioli MD.**  
Professor of Obstetrics and Gynecology, Director of Gynecology and Physio-pathology of Reproduction Unit, Bologna University, Italy

**Course Coordinator :**

**Mohamed Mabrouk MD, PhD**  
Senior Consultant, Minimally Invasive Gynecological Surgery, Gynecology and Physio-pathology of Reproduction Unit, Bologna University, Italy. Assistant Professor of Obstetrics and Gynecology, Alexandria University, Egypt.

## Instructors

**Paolo Casadio**

Senior Consultant, Minimally Invasive Gynecological Surgery, Gynecology and Physio-pathology of Reproduction Unit, Bologna University, Italy

**Hesham Salem, MD**

Professor of Obstetrics and Gynecology  
Faculty of Medicine-  
Alex University

**Prof. Fady Moiety, MD**

Professor of Obstetrics and Gynecology  
Faculty of Medicine- Alex University
